Lawn Care Program
Is your lawn taken over by crabgrass? Looking dead in spots? Let us take back control of your lawn with our 5-Step professional program. Give us a call for a no-obligation appointment.

1. **Pre-emergence Crabgrass & Weed Control** [Early Spring]
   Applied in March or April for well-balanced fertilization and crabgrass control prior to the ground temperature reaching 55°, after that a reputable provider will tell you honestly that no crabgrass treatment will be effective as the seed has germinated and the only thing that can be done is a spray control application in the Fall to ward off Spring germination.

2. **Weed Control & Fertilization** [Late Spring / Early Summer]
   Applied in May or June for maintaining broadleaf weed control and a well-balanced fertilization. Can be performed together with the 3rd step.

3. **Broadleaf Control Liquid Spray** [Late Spring / Early Summer]
   Applied in May or June for immediate control of many broadleaf weeds including dandelions, chickweed, clover, etc. Can be performed together with the 2nd step.

4. **Weed Control & Fertilization** [Early Fall]
   Applied in August or September for maintaining broadleaf weed control and a well-balanced fertilization.

5. **Winter Fertilization** [Late Fall]
   Applied in October or November to help with root system growth and early green up in the Spring.

Additional Services
Our 5 Step Lawn Care Program is not all we do. Check out our additional services below.

- **Broadleaf Spray Only** [Spring or Fall]
  Immediate control of many broadleaf weeds including dandelions, chickweed, clover, etc.

- **Core Aeration** [Spring or Fall]
  A mechanical procedure pulling 2-3" plugs throughout the lawn. This loosens soil compaction, allows the roots to grow and for water, nutrients and oxygen to get to the root system. Recommended in the Fall with an established 5-Step or in Spring when starting one.

- **Insect & Disease Control** [Spring, Summer or Fall]
  Various insects and diseases can be detrimental to your lawn, landscape and trees. Call today for a professional assessment for your individual needs.

- **Vegetation Control** [Spring, Summer or Fall]
  Overgrown shrubs, bushes, gravel driveways, fence lines? With treatment, we can stop the life cycle of noxious, out-of-control vegetation and breeding ground for pests. Treatment can be paired with use of excavation equipment, no job is too complex.

Contact us today! 937-548-1705
